- Comparative Linguistics
- English for Specific Purposes (ESP)

## Past and Current Research Projects

### Machine Learning

- **Persian Language Games** **2017-present**
  - *Developed two Persian language games with the purpose of crowdsourcing language data, and aimed at using the data collection method to compile and generate annotated Persian language corpora. Seek for external fund for commercialization.*
- **Abstractive Multi Document Summarizer** **2016**
  - *Generated an abstractive multi-document Farsi text summarizer to cover the overall context, minimize the redundancy and increase the readability of the output text. Co-authored a grant proposal for Information and Communication Technology Council (2017).*
- **Word Graph-based Method of Generating Compressions** **2015**
  - *Proposed an unsupervised learning approach for automatic sentence extraction using word graph-based method.*

### Cognitive Sciences

- **Feasibility Study on Setting up a Brain and Language Laboratory** **2016**
  - *Developed a research project and led a team to study basic evaluations, estimated cost of operation, funding, needed equipment, and available resources for setting up a brain and language laboratory at Sharif University of Technology (Part of a grant proposal for Cognitive Sciences and Technologies Council).*

### Machine translation

- **Bilingual Persian- English Parallel Corpus** **2011-present**
  - *Generated a sentence-aligned corpus for improving machine learning in statistical machine translation. Granted by Sharif University of Technology (2011- 2016).*
  - *Created a prototype with the size of 1,500,000 words in each language. (Part of a grant proposal for Iran Telecommunication Research Center on Sharif English-Farsi Parallel Corpus (2017)).*
- **“Dash/Hyphen” in Persian Text** **2012**
  - *Conducted a hyphen tokenization research on recognition, classification and studying the usage of different characters generally called “dash/hyphen” in Persian text, and performed to automatically identify, replace, and analyze any of them on Persian language processors. Granted by Sharif University of Technology.*
- **Hyphen Tokenization** **2009-2010**
  - *Performed a hyphen tokenization research project to identify the emergence and to classify the usage of different characters generally called “dash/hyphen” in a ninety million word corpus. Granted by Sharif University of Technology.*
